Engineering News-Record index

CONTENT

Part I—Subject Index

The index includes all articles that have appeared within the dates covered, with the exception of certain Briefs (such as Labor Briefs, Careers) and Obituaries.

The subject headings under which all articles are indexed appear in alphabetical order. Within the subject headings the entries are listed chronologically.

Many important headings are divided into subheadings, for example, BRIDGES—by states or countries; CITIES—by name; BUILDINGS—by type (churches, garages, etc.).

International coverage is shown under the letter "I." The items here listed geographically also appear under the appropriate subject headings.

Part II—Names

Part II of the index contains names of authors, personalities, and companies. Listed here are the names of people who are the subject of articles; names of authors of by-lined articles and published letters; and names of firms about which articles were written.

Individuals or firms simply mentioned in feature articles about various construction projects are seldom indexed by name. Those, on the other hand, who are listed under **Names** will usually not appear under the subject heading. For example, an article about the Smith Construction Co. appears only in the **Names** section and will not be found under the heading CONTRACTORS.

Part III—Product Manufacturers

Items that describe new materials and equipment, including Product Briefs, are indexed under this heading, by manufacturer's name.

TERMS USED

See means that all entries on the subject will be found under another heading: EXCAVATING, **see:** SOIL.

See also means that a related heading should also be checked: SEWAGE, **see also**: WATER POLLUTION.

The following abbreviations and signs are used:

RC —Reader Comment
CW —Construction Week
WO —Washington Observer
B —Brief and Around the World
e —Editorial
** —Article with several illustrations
* —Illustrated article (if asterisk precedes entry, reference is to a picture with caption only.)

ENGINEERING NEWS RECORD is published every Thursday. There are 25 or 26 issues in each half-yearly volume, covering January to June and July to December, starting with vol. 78 in 1917, when ENGINEERING NEWS and ENGINEERING RECORD joined forces under the present title.

CONTENTS

Part I
Subject Index

Part I lists all editorial items except for certain Briefs (Books, People, Obituaries, Publications, Pulse).

Subject headings appear in alphabetical order. Items under the subject headings are listed chronologically, or, in some cases, alphabetically by name (e.g., dams, rivers) or location (city, state or country).

Major headings are also sometimes subdivided for the purpose of pinpointing areas of specialization or recent developments in a given field (e.g., POWER: Solar, Alternative).

International coverage is indexed under "I," alphabetically by country, and cross-indexed under the appropriate subject headings.

Part II
Names

Part II lists alphabetically individuals and companies who are the subject of articles; authors of bylined articles and letters; all individuals whose photographs have been published. Generally, names mentioned in various articles are not indexed.

Part III
Product Manufacturers

Part III lists alphabetically the manufacturers of all new materials and equipment described in the editorial pages, including Briefs.

TERMS USED

See means that all entries on the subject will be found under another heading: EXCAVATING, **see:** SOIL.

See also means that a related heading should be checked: SEWAGE, **see also:** WATER POLLUTION.

Codes used:

CONTENTS

Part I
Subject Index

Part I lists all editorial items except for certain Briefs (Books, People, Obituaries, Publications, Pulse).

Subject headings appear in alphabetical order. Items under the subject headings are listed chronologically, or, in some cases, alphabetically by name (e.g., dams, rivers) or location (city, state or country).

Major headings are also sometimes subdivided for the purpose of pinpointing areas of specialization or recent developments in a given field (e.g., POWER: Solar, Alternative).

International coverage is indexed under "I," alphabetically by country, and cross-indexed under the appropriate subject headings.

Part II
Names

Part II lists alphabetically individuals and companies who are the subject of articles; authors of bylined articles and letters; all individuals whose photographs have been published. Generally, names mentioned in various articles are not indexed.

Part III
Product Manufacturers

Part III lists alphabetically the manufacturers of all new materials and equipment described in the editorial pages, including Briefs.

TERMS USED

See means that all entries on the subject will be found under another heading: EXCAVATING, **see:** SOIL.

See also means that a related heading should be checked: SEWAGE, **see also:** WATER POLLUTION.

Codes used:

CONTENTS

Part I
Subject Index

Part I lists all editorial items except for certain Briefs (Books, People, Obituaries, Publications, Pulse).

Subject headings appear in alphabetical order. Items under the subject headings are listed chronologically, or, in some cases, alphabetically by name (e.g., dams, rivers) or location (city, state or country).

Major headings are also sometimes subdivided for the purpose of pinpointing areas of specialization or recent developments in a given field (e.g., POWER: Solar, Alternative).

International coverage is indexed under "I," alphabetically by country, and cross-indexed under the appropriate subject headings.

Part II
Names

Part II lists alphabetically individuals and companies who are the subject of articles; authors of bylined articles and letters; all individuals whose photographs have been published. Generally, names mentioned in various articles are not indexed.

Part III
Product Manufacturers

Part III lists alphabetically the manufacturers of all new materials and equipment described in the editorial pages, including Briefs.

TERMS USED

See means that all entries on the subject will be found under another heading: EXCAVATING, **see:** SOIL.

See also means that a related heading should be checked: SEWAGE, **see also:** WATER POLLUTION.

Codes used:	
L Letters	**Article with two or more illustrations
CW Construction Week	*Article with a single illustration; (if asterisk precedes entry, reference is to illustration with caption only). Drawings, charts, maps are identified as such.
WO Washington Observer	
B Brief and News in Brief	
E Editorial	

ENGINEERING NEWS-RECORD is published every Thursday except the last week in December. There are two volumes per year, January to June and July to December, starting with volume 78 in 1917, when ENGINEERING NEWS and ENGINEERING RECORD merged.

10 REASONS WHY YOU SHOULD BE READING *INTERNATIONAL CONSTRUCTION WEEK*

Engineering News-Record's Newsletter of Construction, Planning, Finance and Design

1. No where else can you get better **SPECIFIC INFORMATION** on where new international construction business is developing. Verified, accurate reports of major projects in early stages of planning and bidding are relayed each week.

2. You learn of major new developments early enough to take advantage of these **ADVANCE OPPORTUNITIES** for studies and design contracts.

3. **PRACTICAL,** concise intelligence is given: the size and scope of planned projects, their locations, who's involved . . . and the telex numbers and/or addresses of the most important contacts.

4. Specifically **DESIGNED FOR YOU,** the managers and marketers engaged in the export of design, contracting, equipment, materials, or financial services.

5. McGraw-Hill's unparalleled worldwide reporting staff telexes daily verified construction news. Their reports are on your desk each week. Their valuable research **SAVES TIME AND MONEY** for you and your staff.

6. *International Construction Week's* **RANGE OF MAJOR PROJECTS REPORTED**, including airports, harbors, highways, nuclear and hydroelectric power, water supply, flood control, pollution control, manufacturing plants, synfuel plants, mining developments, housing, hotels, hospitals, and other heavy construction projects, gives you the crucial advantage in all these fields.

7. Readers in over 65 countries find their new business leads in *International Construction Week*. It is the **KEY TO PROFITS WORLDWIDE**, especially in the opportunity-rich developing regions.

8. **IMPORTANT DEVELOPMENTS** that will affect your business are reported—the political, legal and financial actions that impact your markets—the background you need for decision-making.

9. *International Construction Week's* **SUBSCRIPTION GUARANTEE** policy allows you to cancel within 30 days if not completely satisfied and you receive a full refund.

10. Your **COMPETITORS** are already reading *International Construction Week*. Can you afford not to?
